

QS/1® WebServices™

QS/1's WebServices provides pharmacies with affordable ways to utilize the power of the Internet. Establish an Internet presence with a personalized website from CornerDrugstore.com®. Or, for pharmacies with an existing website, QS/1 can add functionality for online prescription refills. Provide your customers with 24-hour service, seven days a week with the help of QS/1 WebServices.

QS/1 WebServices Features

Online Prescription Refills

- Communicate directly with your pharmacy management system
- Allow patients to submit multiple prescription refills at once
- Provide customers with a simple, easy-to-use online refill order process
- Offer delivery or pick-up options to patients during refill processing
- Real-time connection to pharmacy system
- Backup fax delivery

Implementation

- Integrate QS/1 online prescription refills and health content with existing pharmacy websites built with any of the following languages: ASP, ASPX, .NET, Java, or Cold Fusion (CF)
- Enable your website developer to access content with QS/1's WebServices development kit
- Add new services easily and quickly with Rapid Application Design (RAD)
- Support the management of your website with assorted reports
- Built as a web service that is not platform specific
- No additional hardware or third party software required for web server

Efficient Management Interface

- Secure online management portal
- See real-time listings of online refill activity
- Easily adjust refill processing times
